What is PartnerPave?

[PartnerPave](#) is a first-of-its-kind partner marketing system that makes it easy for websites to bundle their products and services with *yours*, and sell both on *their* website.

It's powered by [Stripe](#) — the same technology behind Lyft — and ideal for anyone looking to increase revenue for their online business or digital products.

Main Benefits

- Businesses using [Stripe](#) can tap into a new revenue stream and [generate revenue without web traffic](#) by allowing partners to package their products and services with theirs and sell it on their website. As a result, you get paid like the sale took place on your website.
- PartnerPave provides a cost-effective means to generate revenue without relying on paid forms of advertising, which includes:
 - Pay Per Click
 - YouTube
 - Facebook
 - Banner Advertisements
 - LinkedIn
 - Print Advertising
- No subscription plan is required to use PartnerPave. The only cost is the initial upfront purchase.
- No fees. Stripe does not take any fees from the revenue you collect from partners and does not charge you for partners.

- You can have unlimited partners, and you aren't charged for each partner.
- We have several integrations available with popular eCommerce platforms like Shopify and WooCommerce and transactional email providers like SendGrid, Mandrill, and PostMarkApp.

Charity Contributions

Giving back to charities is an absolute must for PartnerPave. Because of this, we donate \$5 to charity for every sale of our software.
